

Introduction to Miss Caeti

Hi, everyone! My name is Miss Caeti and I am the new NET here to replace Mr McGinness for the rest of the year.

I have come all the way from the United Kingdom (U.K.) and this is my first time in Hong Kong. I think Hong Kong is a crazy place and no one ever stops even at night time! I am living in Yau Ma Tei and there are always people outside either shopping, working or driving past.

I think the Hong Kong students are very hard-working but always seem quite stressed (you should come to the English corner to relax at lunchtime!). I know my school life was a lot easier than theirs.

One thing I'm really enjoying is the local food, however it is very difficult for me to find Asian food that is vegetarian friendly. By the time the school year is over, I want to be able to use chopsticks just as well as all the locals.

Back home in Wales (which is a country in the U.K.) I am an actor and that is what I studied at university. I love anything to do with Drama and would love for some students who also love drama to come and see me in the English corner at lunchtime or after school.

Ronny and Alessio Interview

R- Ronny 3C A- Alessio 4E

R- Can you tell us a bit about yourself?

A- Hi everyone, my name is Alessio Insalata. I am 16 and I come from Varese in Italy.

R- Why did you choose to study in Hong Kong and not another country?

A- I chose to come to Hong Kong because it is a very big city with lots of different cultures to explore. There is a lot of food to try and places to explore.

R- How different is school here in Hong Kong compared to school in Italy?

A- The school is very different. In Italy we have a lot of different types of high schools and you can choose the school you want to study at depending on your dream job.

R- That is very interesting. What is your dream job?

A- My dream job is to be a pilot so I go to an aeronautical high school in Italy.

R- What do you like to do in your free time?

A- During my free time, I like to play electric guitar. I also play football and hang out with my friends.

R- Thank you for your time.

A- My pleasure!

Chianta's sharing in Finland

Chianta Yip Ting 4A (2018-19)

I came to Finland around one and a half months ago. Living in Finland is very fun. It is totally different from Hong Kong. I think the Finnish people are nice, but they are too shy!

I came to school on the first day. The classmates came to greet me and asked me where I am from and what my name is. After that, they didn't talk to me, until I talked to them and they were very nice to me. I met many new friends in school.

In school, the teachers teach in Finnish. I have only just started to learn Finnish so I don't understand what the teachers say in the lesson, but other classmates will try to translate for me. When we do something in a group, they will also explain to me and help me. So, I think they are really nice.

My school year is divided into 6 terms. We can choose different subjects in different terms. It is the second term now. I chose Geography, English, Sport, Art and Music in the first term. In this term, I choose Mathematics, English, Psychology and Art. I am really surprised that they have their tests using an online computer. It is really different from Hong Kong.

My school also provides lunch for students and teachers. At lunch time, I can meet primary and secondary school students and we can eat in the same place.

I am so glad that my host parents are teachers. If I have any difficulties in doing homework, I can ask them. I am also very happy to have a neighbour who is an exchange student too! We can help each other.

Finally, I want to say I most enjoy the saunas in Finland because it is so cold now. A sauna can make me warm.

NET Outing - The Cinema: IT Chapter 2

In late September, Mr. Musni brought a group of students out to see *IT: Chapter 2*. It was a little different because this is actually a horror movie. But since so many students actually really like watching this type of movie, they were actually pretty interested to go.

The story is about an alien that comes to earth and takes the shape of a clown. For some reason that is not explained, this alien needs to kill people and eat them.

Loved it! Way too long. But that's ok because it had great jokes. It was funnier than some of the comedies I've seen.

Mr. Musni

Good! It's fun to go see this kind of movie. I think we should definitely go again. Some students are too scared to see horror movies so maybe we can try a different style next time.

4D Angel

I love scary movies. This one was good too. I didn't know it would be so funny. Actually, it was funnier than scary. Not really a scary movie if you ask me. But good! Can't wait to go again!

6D Moon

So long! It wasn't boring but I don't know why it has to be 3 hours. I think it has too many main characters. That's probably why it's too long.

6D Poon

It was good. Scary and funny. Although I don't think they had enough pretty girls in it. They should change that for the next one.

6A Carson
